

Question 11. *Provide documentation that describes the expected and/or guaranteed SO₂ control efficiency and/or outlet emission rates (lb/MMbtu) for the scrubbers after the installation of the wall rings on Unit 1 & 2 at the facility. Documentation should also include all boiler operation, scrubber operation, and fuel condition requirements specified to meet these SO₂ control efficiency and/or emission rates.*

Response:

Attached are copies of the documents responsive to this request.

This response was prepared by IPSC employee Jerry Hintze.
